

Certified Full Stack Web Developer with hands-on experience in front-end and back-end technologies through CareerFoundry’s immersive program. Proficient in JavaScript, React.js, Angular, Node.js, Express.js, MongoDB, and Firestore. Skilled in building responsive UIs with Bootstrap and Material UI, and integrating secure authentication with OAuth.

Experienced in deploying scalable apps using AWS (S3, EC2, Lambda, IAM, VPC) and following Git, GitHub, and Agile workflows. Passionate team player with strong intuition, grit, and a growth mindset—thrives in collaborative environments focused on building real user value.

Major Projects

ToolBoxWarz | Full Stack

Preview

React Material Design O Auth Firestore AWS

- Developed an E-commerce & Blog platform for Bicycle Tools and technical know how... and nerding out about Custom overly engineered toolboxes.
- Used React, Material UI and some custom components to create a clean and efficient UI.
- Integrated AWS & Firestore with node.js/express for a scalable backend .
- Deployed on Vercel

Movie App | Full Stack

Preview

MongoDB Express Angular Node.JS RESTful API

- Built a MEAN stack movie database app with secure user authentication, profile management, and favorite movie tracking.
- Implemented responsive UI using Angular.
- Integrated MongoDB Atlas with Node.js/Express RESTful API for scalable backend.
- Deployed app on Netlify with CI/CD using GitHub

Education

Career Foundry | Full Stack Web Development

June 2024 - May 2025

- Developed Web Dev Skills
- Implementesssd responsive UI using React and Bootstrap.
- Integrated MongoDB Atlas with Node.js/Express RESTful API for scalable backend.
- Deployed app on Heroku with CI/CD using GitHub and Netlify. HELLO

Quinnipiac University | Marketing B.A

August 2016 - May 2020

- Developed a strong understanding for marketing and user behavior
- Kept up to date with best practices for Internet based marketing.
- Continued to explore tech by taking courses in intro to computer science & python.
-

Prior Experience

Bozzuto Management Company | Leasing Agent

August 2021 - June 2024

- Generated consistent top sales performance, surpassing quarterly quotas and earning company-wide recognition.
- Led onboarding for 100+ residents to mobile app systems; resolved technical issues with empathy and clarity.
- Built strong community relationships, boosting renewal retention and streamlining maintenance resolution.
- Delivered 105/100 blind shop evaluations through exceptional service and product knowledge.
- Audited leasing and CRM data for 500+ resident profiles, improving operational efficiency.

Core Strengths

Cloud Deployment & Scalability: Deployed projects using Heroku, S3, and AWS Lambda.

Agile & Modular Development: Applied Agile principles, Git-based workflows, and responsive modular design.

Full-Stack Engineering: Delivered scalable applications using MERN stack with RESTful APIs.

Database Design: Built schemas and managed data using MongoDB Atlas and SQL.

UI Framework Proficiency: Built UIs with React, Bootstrap, TypeScript, Angular and Vue.js.

Technical Skills

Languages: JavaScript, HTML, CSS, Python, PHP, Java, C#

Frameworks & Libraries: React.js, React Native, Angular, Vue.js, TypeScript, Node.js, Express.js, Bootstrap

Databases & Backend Services: MongoDB, SQL, Firebase

Cloud Platforms & DevOps: AWS (S3, Lambda, EC2, IAM), Heroku, Netlify, Docker

Version Control & Build Tools: Git, GitHub, NPM, Yarn, figma, Adobe XD

Mobile Development: React Native, Android (Java/ Kotlin), iOS (Swift)

Testing & QA: Postman,Cucumber, Jest, React Testing Library

Authentication & Security: OAuth, Firebase Authentication

Development Practices: Agile Methodologies, CI/CD, RESTful APIs, Single Page Applications (SPAs)

Soft Skills

Problem Solving • Analytical Thinking • Technical Communication • Collaboration • Adaptability
